## GETTING BACK TO WORK

MILWAUKEE MONTESSORI SCHOOL USES A “LAYERED-DEFENSE APPROACH” TO LOWER THE RISKS OF TRANSMITTING COVID-19 ON SCHOOL GROUNDS.

### REDUCE EXPOSURE TO ILLNESS

One of the best ways to help stop the spread of the virus is to stay home if you are sick and keep your child home if he or she has a temperature over 99.8. To help reduce exposure, each morning in the drop-off line, before your child can exit the vehicle, an MMS employee will take your child's temperature using an infrared thermometer. If an elevated temperature is seen, it will be rechecked to ensure it is accurate, and if there is a fever, your child will be sent back home.

### PERSONAL PROTECTIVE EQUIPMENT (PPE)

MMS employees will wear masks and gloves when working with children and adults at drop-off and pick-up to reduce the risk of coming in contact with or spreading germs.

### PERSONNEL MANAGEMENT

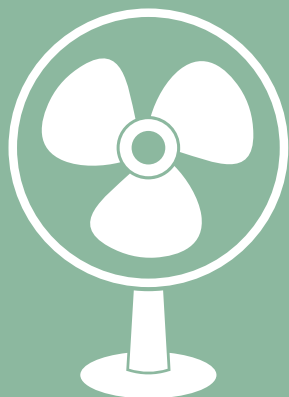

We have designated specific faculty and staff members to work with and remain with the same group of children for the duration of each session.

### BUILDING MAINTENANCE

Common areas in our facility will be cleaned hourly during the day, and every evening, every classroom will be sanitized and cleaned. UV lights will be used to disinfect tables, chairs, and toys, and an electromagnetic sanitizer will be used in all classrooms in the evening hours.

### BUILDING VENTILATION

We have a brand-new HVAC system that ensures good airflow, and we also open windows to keep clean air circulating throughout the building.
